

THE CYBER ELEPHANT IN THE BOARDROOM

Founder & CEO of VigiTrust

Mathieu Gorge is the CEO and founder of VigiTrust, a company that provides Integrated Risk Management (IRM) SaaS solutions to clients in 120 countries across various industries. Mathieu helps CEOs, CXOs, and boards of directors handle cyber accountability challenges through good cyber hygiene and proactive cybersecurity compliance programs. Mathieu believes in keeping his methodology, The 5 Pillars of Security Framework™, updated to reflect the latest security and compliance regulations, and the newest security threats. He is a Featured ForbesBooks Author, innovator, and in-demand speaker.

Chairman, VigiTrust Global Advisory Board

The VigiTrust Global Advisory Board is linked to VigiTrust, a SaaS provider of Integrated Risk Management solutions that enable clients to comply with legal and industry standards and laws around data protection. VigiTrust's core strength is its ability to keep ahead of the various legal, operational, and technical security and compliance challenges faced by its clients.

Featured Forbes Author – The Cyber Elephant in the Boardroom - 2020

The Cyber Elephant in the Boardroom delivers strategies and best practices for dealing with today's cybersecurity issues and provides guidance for the next decade of risks. As companies begin to adjust to mounting security issues, senior leadership teams and CXOs will require simple ways of understanding and addressing these threats. The 5 Pillars of Security Framework™ is the perfect foundational tool. The 5 Pillars of Security Framework™ transcend industries and can be applied to organizations of any size and type. They are timeless in nature. If you or your business need future-proof cyber-security strategies, The Cyber Elephant in the Boardroom is an indispensable reference for helping key stakeholders to understand their roles.

Forbes Podcast – Security is A Journey not a Destination

Cyber-attacks have shown that no one is safe. Join me each week as I interview thought leaders and company executives that are leading cyber readiness initiatives, cyber security programs, and digital forensics investigations. If you want to implement clear plans to manage your risk and demonstrate cyber-accountability, this is the podcast for you.
